Launched in 1971, the Alfasud was an all-new departure for Alfa Romeo, both in its design and its execution and became the best-selling model in the history of Alfa Romeo . Originally it was developed with the dual intentions of launching the company into large volume production and providing a more affordable model than their highly regarded sports cars. However, its story was far from straightforward. Although respected for its technically brilliant design and universally praised for its ride and handling, the model never quite reached its full sales potential and its reputation was marred by problems that could not have been foreseen. With over 240 colour photographs, the book includes a brief history of Alfa Romeo to the end of the 1960s. The development of the Alfasud's design and the political reasons for building a new factory are given along with the car's reception from both the press and owners. The evolution of the model from initial prototypes, to the improvements to build quality and performance, including the Giardinetta and Sprint variations are covered as well as Alfasuds in competition. The political and labour problems, as well as the early quality control issues are discussed. Finally, there are numerous specification tables, performance data, chassis numbers, engine codes and colour charts.

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the

It has been 110 years since Alfa Romeo was founded. A name that has become synonymous with cars, so important has its presence been both industrially and in motorsport. Over this long period of time, the celebrated Italian manufacturer has created cars that have become part of motoring history such as the 1900, the Giulietta, the Giulia and the Alfetta. At the same time, Alfa Romeo has enjoyed an outstanding sporting career, winning all of the most significant races and titles, among them the Mille Miglia, the 24 Hours of Le Mans, the Tourist Trophy and the Formula 1 World Championship. This book, which first appeared in 2010 when Alfa Romeo (under the title 'Alfa Romeo 1910-2010') celebrated its first century, was written by the late Maurizio Tabucchi, an expert on the history of the marque, who passed away a few years ago. His work has now been updated to include all the latest models produced from 2017 to the present day such as the Stelvio and the Giulia Quadrifoglio Verde. The book has been completed with an examination of the Alfa Romeo marque's return to competition in partnership with Sauber, demonstrating that its "sporting heart" is still beating as strongly as ever.
