"Australian curriculum science-foundation to year 7 is a series of books written specifically to support the national curriculum. Science literary texts introduce concepts and are supported by practical hands-on activities, predominately experiments."--Foreword.

"Australian curriculum science-foundation to year 7 is a series of books written specifically to support the national curriculum. Science literary texts introduce concepts and are supported by practical hands-on activities, predominately experiments."--Foreword.

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

This state-of-the art research Handbook provides a comprehensive, coherent, current synthesis of the empirical and theoretical research concerning teaching and learning in science and lays down a foundation upon which future research can be built. The contributors, all leading experts in their research areas, represent the international and gender diversity that exists in the science education research community. As a whole, the Handbook of Research on Science Education demonstrates that science education is alive and well and illustrates its vitality. It is an essential resource for the entire science education community, including veteran and emerging researchers, university faculty, graduate students, practitioners in the schools, and science education professionals outside of universities. The National Association for Research in Science Teaching (NARST) endorses the Handbook of Research on
