A powerful debut novel tells of a wartime photographer who plays an unfortunate role in the disappearance of a friend and colleague as they cover a third-world conflict together and his subsequent struggle to cope with his feelings guilt and grief upon returning to New York. Reprint.

This book offers 150 12-lead ECGs and rhythm strips, each with a clinical case history and question. The full ECG is reproduced and a study of it with the case history should be enough to give an answer. On the back the case is examined, with a description of the main features of the ECG along with a clinical interpretation and a "what to do" section. The cases are graded in difficulty. The unique page size allows presentation of all 12-lead ECGs across a single page for clarity. Several of the cases incorporate chest X-rays and coronary angiograms illustrating the appearances that are associated with various cardiac conditions. All the cases are graded in difficulty and are cross-referenced to the new editions of ECG Made Easy and ECG in Practice for further information. For this Fourth Edition over 30 new ECGs

have been included, mainly to provide clearer examples, though the book deliberately retains some technically poor records to maintain a 'real-world' perspective.

As sharp as a knife and with great psychological insight the author investigates the "we" feeling versus the longing for freedom and individuality.

Iran, 1969. In the house of the mosque, the family of Aqa Jaan has lived for eight centuries. The house teems with life, played out under the watchful eyes of the storks that nest on the minarets above. But this family will experience upheaval unknown to previous generations. For in Iran, political unrest is brewing. The shah is losing his hold on power; the ayatollah incites rebellion from his exile in France; and one day the ayatollah returns. The consequences will be felt in every corner of Aqa Jaan's family.

The renowned Internet commentator and author of *How to Fix the Future* " expos[es] the greed, egotism and narcissism that fuels the tech world " (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet ' s deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. " Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard. " —Po Bronson, #1 New York Times–bestselling author

Bear Grylls is one of the world's most famous survivors. *Bear Grylls: Two All-Action Adventures* combines two of his greatest adventures told in *Facing Up* and *Facing the Frozen Ocean*. At the age of twenty-three, Bear Grylls became one of the youngest Britons to reach the summit of Mount Everest. At extreme altitude youth holds no advantage over experience, nevertheless, only two years after breaking his back in a freefall parachuting accident, he overcame severe weather conditions, fatigue and dehydration to stand on top of the world's highest mountain. *Facing Up* is the story of his adventure, his courage and humour, his friendship and faith. *Facing the Frozen Ocean* tells of a carefully calculated attempt to complete the first unassisted crossing of the frozen north Atlantic in an open rigid inflatable boat. But this expedition became a terrifying battle against extreme elements and icebergs as large as cathedrals. Starting from the remote north Canadian coastline, Bear Grylls and his crew crossed the infamous Labrador Sea, pushed on through ice-strewn waters to Greenland and then found themselves isolated in a perfect storm 400 miles from Iceland. This is a compelling, vivid and inspirational tale.

Pluck has a little red tow truck. He drives it all over town looking for a place to live. Then Dolly the pigeon tells him that the tower of the Pill Building is empty. In the Pill Building, Pluck meets Mr. Penn and Zaza the cockroach. Pluck makes lots more friends and solves all kinds of problems. But the biggest problem is Dove Grove. It used to be a garden with tall trees, but it has been neglected and gone wild. Grown-ups never go there, but the kids from the Pill Building love playing there. But now the Park Superintendent has decided to chop down the trees to make a paved square. Pluck and his friends try to save Dove Grove. But first he has to rescue Longmount from the canal.
