Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits

through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make *The Car Hacker's Handbook* your first stop.

Morocco 2040: Emerging by Investing in Intangible Capital documents the major economic and social strides made by Morocco over the past 15 years and analyzes the economic conditions for accelerating the pace of economic catch-up by 2040. A virtuous yet realistic scenario suggests that with higher productivity gains Morocco could double its current pace of convergence with Southern European countries. In

one generation, Morocco's standard of living could reach about 45 percent of that of Spain, its immediate Northern neighbor, compared to the current rate of 22 percent. To lay out the possible pathways for Morocco to become the first North African country to attain upper middle income status, the Book then investigates the policies that could bring about such a virtuous scenario of accelerated economic convergence. It shows that sustaining higher productivity gains for 25 years would require greater efforts at building Morocco's institutional, human and social capital—what is also known as intangible capital. Accumulating such intangible capital necessarily take a number of different forms and the Book proposes a four-pronged approach. First, by strengthening Morocco's market institutions for a more efficient allocation of capital and labor and international integration. Second, by strengthening Morocco's public institutions to strengthen the rule of law and justice, modernize the public administration, and improve the quality of public service delivery. Third, by strengthening Morocco's human capital, especially education, health and the development of early childhood. And fourth, by strengthening Morocco's social capital through greater gender parity and increased interpersonal trust and civism in society. By placing more of a priority on its intangible capital, Morocco would be advancing a social contract based on the promotion of a more open society. It would be taking a route that is partly new, but which is also the logical outcome of many economic and social diagnoses and pressing calls for change.

A memoir by the mustachioed baseball pitcher who went playing rocky, trash-ridden fields in Castro's Cuba to becoming a Boston Red Sox legend. Luis Tiant is one of the most charismatic and accomplished players in Boston Red Sox and Major League Baseball history. With a barrel-

chested physique and a Fu Manchu mustache, Tiant may not have looked like the lean, sculpted aces he usually played against, but nobody was a tougher competitor on the diamond, and few were as successful. There may be no more qualified twentieth-century pitcher not yet enshrined in the National Baseball Hall of Fame. His big-league dreams came at a price: racism in the Deep South and the Boston suburbs, and nearly fifteen years separated from a family held captive in Castro's Cuba. But baseball also delivered World Series stardom and a heroic return to his island home after close to a half-century of forced exile. The man whose name—"El Tiante"—became a Fenway Park battle cry has never fully shared his tale in his own words, until now. In *Son of Havana*, Tiant puts his heart on his sleeve and describes his road from torn-up fields in Havana to the pristine lawns of major league ballparks. Readers will share Tiant's pride when appeals by a pair of US senators to baseball-fanatic Castro secure freedom for Luis's parents to fly to Boston and witness the 1975 World Series glory of their child. And readers will join the big-league ballplayers for their spring 2016 exhibition game in Havana, when Tiant—a living link to the earliest, scariest days of the Castro regime—threw out the first pitch.
