Kimmel Financial Accounting, 7th Edition provides just the right amount of information students need to come to class prepared, while powerful visuals and Interactive Tutorials make complex accounting concepts possible to absorb quickly. Starting with the big picture of financial statements first, Paul Kimmel shows students why financial accounting is important to their everyday lives, business majors, and future careers. This best-selling financial accounting text is known for the most relevant and easy to understand examples, while teaching students the accounting cycle through the lens of one consistent story of Sierra Corp, an outdoor adventure company.

For introductory courses in Financial Accounting taught from a more traditional "preparer" approach. Financial Accounting, 7e helps the student "nail" the accounting cycle up front to increase student success and retention later.

Wild's Managerial Accounting presents the managerial accounting course content using a corporate approach. It features the same student-friendly writing style and learning tools that have enjoyed consistent success with students and instructors using other texts in the Wild series. Also consistent with this series is Managerial Accounting's focus on the "Three C's": Clear presentation of accounting concepts, Concise coverage to help students focus on important material, Cutting edge technology to engage students and improve their chances for success. The author provides a balance of small and large.

Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.

This work takes a real-world, single focus company approach in every chapter. The decision-making focus shows the relevance of financial accounting regardless of whether the student has chosen to major in accounting.
