One of the central figures in modern landscape architecture, Garrett Eckbo (1910-2000) was a major influence in the field during an active career spanning five decades. While most of the early American designers concentrated on the private garden and the corporate landscape, Eckbo's work demonstrated innovative design ideas in a social setting.

Landscape for Living - Library of American Landscape History

Garrett Eckbo (November 28, 1910 – May 14, 2000) was an American landscape architect notable for his seminal 1950 book Landscape for Living. Garrett Eckbo by Imogen Cunningham , 1946 Eckbo, Dean, Royston, Williams

Garrett Eckbo - Wikipedia

A quintessential twentieth-century text in a field that has shied away from theory, Landscape for Living stands apart with Christopher Tunnard ' s Gardens in the Modern Landscape (1938, 1948) and Ian McHarg ' s Design with Nature (1969) as remarkable attempts to define the field in relation to planning and the environment. Eckbo illustrated its theory, defined as " a generalization of social experience, " with his own projects and those of the firm.

Landscape for Living (1950) (American Society of Landscape ...

Garrett Eckbo (1910 - 2000) Widely regarded as the father of Modern landscape architecture, Garrett Eckbo saw landscape design as a vehicle for social change. His seminal 1950 book *Landscape for Living* essentially defined Modern landscape architecture, and his influence on generations of designers continues today.

Garrett Eckbo | Los Angeles Conservancy

Garrett Eckbo (born November 28, 1910; died May 14, 2000) was a modernist American landscape architect, whose philosophy attempted to push past what he referred to as the *Beaux-arts* approach to landscape design and instead to develop what he saw as a thoroughly Modernist approach: one that integrated and attempted to resolve the conflicts between ecology/environment and society/culture.

A beautifully illustrated consideration of the life and career of modernist landscape architect Garrett Eckbo.

These 22 essays assess the tenets, accomplishments and limits of modernism in landscape architecture and formulate ideas about possible directions for the future of the discipline. The historical and cultural framework within which modern landscape designers have worked is also explored.

How to plan, build, and plant to achieve useful and beautiful outdoor space for living.

The modern period in landscape architecture is enjoying the fascinated appreciation of scholars and historians in Europe and the Americas, and new themes, new subjects and new appraisals are appearing. This book contributes to the conversation by focusing on the work of a singular designer who spent his entire career in a province of the North Island of New Zealand. Ted Smyth practiced an assured landscape modernism without ever seeing the designs of his forebears or his contemporaries working in the UK, Europe and the United States. Designing in isolation from the mainstream of modernism, and a little after its high tide, Smyth produced a series of gardens that provoke a reevaluation of the diffusionist model of influence. The book explains and describes the evolution of Smyth's design vocabulary and relates it to the development of tropical landscape modernism in other Asia-Pacific sites. It shows how a culture of garden modernism can be generated from within a particular locale, and highlights Smyth's engagement with Mori design traditions in search of a specific expression of the high modern essentialism of place.

Invisible Gardens is a composite history of the individuals and firms that defined the field of landscape architecture in America from 1925 to 1975, a period that spawned a significant body of work combining social ideas of enduring value with landscapes and gardens that forged a modern aesthetic. The major protagonists include Thomas Church, Roberto Burle Marx, Isamu Noguchi, Luis Barragan, Daniel Urban Kiley, Stanley White, Hideo Sasaki, Ian McHarg, Lawrence Halprin, and Garrett Eckbo. They were the pioneers of a new profession in America, the first to offer alternatives to the historic landscape and the park tradition, as well as to the suburban sprawl and other unplanned developments of twentieth-century cities and institutions. The work is described against the backdrop of the Great Depression, the Second World War, the postwar recovery, American corporate expansion, and the environmental revolution. The authors look at unbuilt schemes as well as actual gardens, ranging from tiny backyards and play spaces to urban plazas and corporate villas. Some of the projects discussed already occupy a canonical position in modern landscape architecture; others deserve a similar place but are less well known. The result is a record of landscape architecture's cultural contribution - as distinctly different in history, intent, and procedure from its sister fields of architecture and planning - during the years when it was acquiring professional status and struggling to define a modernist aesthetic out of the startling changes in postwar America.

When we think of the gardens of Southern California, we tend to think of the enormous semiarid landscapes of the Huntington and Rancho Los Alamitos, often built on the sprawling grounds of former ranches. But there is another garden tradition in Southern California: the modest, rectangular suburban plots designed by the most famous architects of mid-century modernism: Richard Neutra, Rudolph Schindler, Gregory Ain, Raphael Soriano, Harwell Hamilton Harris, A. Quincy Jones, and John Lautner. These architects saw the garden as an outdoor extension of the space of the houses they designed, rather than a neo-Spanish fantasy to be added later by a "landscapist." Their modern gardens made use of low-maintenance, drought-resistant plants, and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise. The first book of its kind, *Private Landscapes* profiles twenty significant gardens-and their accompanying houses-by these celebrated architects. Using contemporary photographs by Julius Shulman and newly commissioned color images, along with plans and plant lists, *Private Landscapes* provides a never-before-seen look at these gardens. As beautiful and practical now as they were 50 years ago, these designs continue to provide inspiration for gardeners and designers everywhere.

While this book is a consideration of what it feels like to be dying, and as such it is a musing on death, it is also centered on life: death has cast a mark on life which gives us a new vision of meaning and purpose. As French examines death's role in her life, she shares a sense of what pain and suffering can mean to a person who utterly denies transcendent thought, of how an experience of closeness to death affects the life we are living now.

Examines the overlooked contributions of modern architects to landscape design

For the first time, a detailed look at two California gardens that were pivotal in defining mid-20th-century landscape design in the United States: Thomas

Church's 1948 Donnell garden in Sonoma, California, and Garrett Eckbo's 1959 ALCOA Forecast garden in Los Angeles. Church's brilliant integration of indoor-outdoor living and Eckbo's imaginative use of new materials like aluminum left nostalgia behind and created America's new backyard. From the Environmental Design Archive at the University of California, Berkeley.
