Hatchback. Does NOT cover T-Sport, Free-Tronic/MMT clutchless transmission or features specific to Verso models. Petrol: 1.0 litre (998cc) & 1.3 litre (1299cc).

A memoir by the mustachioed baseball pitcher who went playing rocky, trash-ridden fields in Castro’s Cuba to becoming a Boston Red Sox legend. Luis Tiant is one of the most charismatic and accomplished players in Boston Red Sox and Major League Baseball history. With a barrel-chested physique and a Fu Manchu mustache, Tiant may not have looked like the lean, sculpted aces he usually played against, but nobody was a tougher competitor on the diamond, and few were as successful. There may be no more qualified twentieth-century pitcher not yet enshrined in the National Baseball Hall of Fame. His big-league dreams came at a price: racism in the Deep South and the Boston suburbs, and nearly fifteen years separated from a family held captive in Castro’s Cuba. But baseball also delivered World Series stardom and a heroic return to his island home after close to a half-century of forced exile. The man whose name—“El Tiante” —became a Fenway Park battle cry has never fully shared his tale in his own words, until now. In Son of Havana, Tiant puts his heart on his sleeve and describes his road from torn-up fields in Havana to the pristine lawns of major league ballparks. Readers will share Tiant’s pride when appeals by a pair of US senators to baseball-fanatic Castro secure freedom for Luis’s parents to fly to Boston and witness the 1975 World Series glory of their child. And readers will join the big-league ballplayers for their spring 2016 exhibition game in Havana, when Tiant—a living link to the earliest, scariest days of the Castro regime—threw out the first pitch.

An account of Franklin Roosevelt’s battle against the power industry to bring electricity to rural communities in the United States. When Franklin Delano Roosevelt took office in the depths of the Depression, high tension—or high voltage—power lines had been marching across the country for decades, delivering urban Americans a parade of life-transforming inventions from electric lights and radios to refrigerators and washing machines. But most rural Americans still lived in the punishing pre-electric era, unconnected to the grid, their lives consumed and bodies broken by backbreaking chores. High Tension is the story of FDR’s battle against the “Power Trust,” an elaborate Wall Street-controlled web of holding companies, to electrify all of America—even when the corrupt captains of the industry and their cronies (led by a formidable and honest champion, Wendell Willkie, whose role in the battle propelled him to a presidential bid to unseat Roosevelt in 1940) cried that running lines to rural areas would not be profitable and that in a free market there would simply have to be a divide between the electricity haves and have-nots. Roosevelt knew better. And in this story of shrewd political maneuvering, controversial legislation, New Deal government organizations like the Tennessee Valley Authority, the packing of Federal courts, towering business figures, greedy villains, and the crying needs of farmers and other rural citizens desperate for services critical to their daily lives, John A. Riggs has chronicled democracy’s greatest balancing act of government intervention with private market forces. Here is the tale of how FDR’s efforts brought affordable electricity to all Americans, powered the industrial might that won World War II, and established a model for public-private solutions today in areas such as transportation infrastructure, broadband, and health care. Praise for High Tension “The little known but captivating story of electricity is at the heart of the New Deal. John A. Riggs is the perfect person to tell the tale.” —Walter Isaacson, author of The Innovators, Leonardo da Vinci, and Steve Jobs “[A] lucid and compelling tale. This is a fresh angle of vision on one of the most important and under-appreciated stories of the first half of the 20th century.” —Jonathan Alter, author of The Defining Moment: FDR’s Hundred Days and the Triumph of Hope “An innovative history of the chaos and conniving that created America’s transformative electricity system. . . . A compelling read. Thoroughly researched and gracefully written. . . . A must for historians, it is also a gripping read for all.” —Martin J. Sherwin, Pulitzer Prize-winning co-author of American Prometheus: The Triumph and Tragedy of J. Robert Oppenheimer “[A]n exhaustive look at President Franklin Roosevelt’s multipronged war against the private utility sector. . . . Riggs dives deep into the legislative, judicial, and public opinion battles over Roosevelt’s energy initiatives, including the Tennessee Valley Authority, and argues that the hybrid public-private system that emerged in America was critical to the nation’s “economic global supremacy” during and after WWII. . . . [T]his authoritative account is a valuable resource for students of America’s energy policy.” —Publishers Weekly

From the author of the celebrated classic Louder Than Hell comes an oral history of the badass Heavy Metal lifestyle—the debauchery, demolition, and headbanging dedication—featuring metalhead musicians from Black Sabbath and Judas Priest to Twisted Sister and Quiet Riot to Disturbed, Megadeth, Throwdown and more. In his song “You Can’t Kill Rock and Roll” Ozzy Osbourne sings, “Rock and roll is my religion and my law.” This is the mantra of the metal legends who populate Raising Hell—artists from Black Sabbath, Judas Priest, Slipknot, Slayer, and Lamb of God to Twisted Sister, Quiet Riot, Disturbed, Megadeth, and many more! It’s also the guiding principle for underground voices like Misery Index, Gorgoroth, Municipal Waste, and Throwdown. Through the decades, the metal scene has been populated by colorful individuals who have thwarted convention and lived by their own rules. For many, vice has been virtue, and the opportunity to record albums and tour has been an invitation to push boundaries and blow the lid off a Pandora’s box of riotous experiences: thievery, vandalism, hedonism, the occult, stage mishaps, mosh pit atrocities, and general insanity. To the figures in this book, metal is a means of banding together to stick a big middle finger to a society that had already decided they didn’t belong. Whether they were oddballs who didn’t fit in or angry kids from troubled backgrounds, metal gave them a sense of identity. Drawing from 150-plus first-hand interviews with vocalists, guitarists, bassists, keyboardists, and drummers, music journalist Jon Wiederhorn offers this collection of wild shenanigans from metal’s heaviest and most iconic acts—the parties, the tours, the mosh pits, the rage, the joy, the sex, the drugs . . . the heavy metal life! Horns up!

Nissan: Patrol Series GQ, 3.0 & 4.2 petrol & 4.2 diesel. Ford: Maverick Series DA. Petrol & diesel models. Does NOT cover UK Ford. Maverick. or Nissan Terrano.

This book constitutes the refereed proceedings of the 17th International Conference on Artificial Intelligence: Methodology, Systems, and Applications, AIMSA 2016, held in Varna, Bulgaria in September 2015. The 32 revised full papers 6 poster papers presented were carefully reviewed and selected from 86 submissions. They cover a wide range of topics in AI: from machine learning to natural language systems, from information extraction to text mining, from knowledge representation to soft computing; from theoretical issues to real-world applications.
