The Space Star scored four stars in the Euro NCAP tests, with a whopping 90% for adult occupancy. There are driver and passenger airbags along with side head and chest airbags. The rear also comes with ISOFIX. The CVT model also comes with Hill Start Assist. It would be nice if this also came with the other models because they're manual.

"This textbook covers all the theory and technology sections that students need to learn in order to pass level 1, 2 and 3 automotive courses from the Institute of Motor Industry, City & Guilds and other exam boards. It has been produced in partnership with ATT Training and is a companion to their online learning resources. Learning is made more enjoyable and effective as the topics in the book are supported with online activities, video footage, assessments and further reading. If you are using ATT Training materials then this is the ideal textbook for your course"--

The definitive international history of one of the world's most successful rally cars. Covers every Lancer model - including all special editions, and Dodge, Colt, Plymouth, Valiant, Eagle, Proton and Hyundai variants - from 1973 to date. Includes a Foreword by Shinichi Kurihara, Mitsubishi's Evo team leader.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

The Real Cost of Insecure Software In 1996, software defects in a Boeing 757 caused a crash that killed 70 people In 2003, a software vulnerability helped cause the largest U.S. power outage in decades In 2004, known software weaknesses let a hacker invade T-Mobile, capturing everything from passwords to Paris Hilton's photos In 2005, 23,900 Toyota Priuses were recalled for software errors that could cause the cars to shut down at highway speeds In 2006 dubbed The Year of Cybercrime, 7,000 software vulnerabilities were discovered that hackers could use to access private information In 2007, operatives in two nations brazenly exploited software vulnerabilities to cripple the infrastructure and steal trade secrets from other sovereign nations Software has become crucial to the very survival of civilization. But badly written, insecure software is hurting people and costing businesses and individuals billions of dollars every year. This must change. In Geekonomics, David Rice shows how we can change it. Rice reveals why the software industry is rewarded for carelessness, and how we can revamp the industry's incentives to get the reliability and security we desperately need and deserve. You'll discover why the software industry still has shockingly little accountability and what we must do to fix that. Brilliantly written, utterly compelling, and thoroughly realistic, Geekonomics is a long-overdue call to arms. Whether you're software user, decision maker, employee, or business owner this book will change your life or even save it.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Provides a business principle that applies strategies and practices extracted from nature, showing how a company can become, like nature, an intricate living system that integrates competing interests.
