Personnel, 10th Edition uses a concise Q&A format to cover the principles, diseases, and problems of dialysis treatment for kidney failure. A new chapter on case management of the patient with chronic kidney disease keeps you current with the latest in dialysis treatment and equipment. Dialysis expert Judy Kallenbach provides clear, easy-to-read guidelines that will apply to every member of the dialysis team, from technicians and nurses to social workers and patients.

Comprehensive coverage provides the knowledge needed to care for dialysis patients and to prepare for the certification exam, with topics including a review of body fluids and electrolytes, infection control, transplantation, and key psychosocial aspects of dialysis treatment. Question-and-answer format makes learning easier and makes the book suitable for independent study. Multidisciplinary approach includes a chapter on the different roles in the hemodialysis team,

The Pacific Symposium on Biocomputing (PSB) 2019 is an international, multidisciplinary conference for the presentation and discussion of current research in the theory and application of computational methods in problems of biological significance. Presentations are rigorously peer reviewed and are published in an archival proceedings volume. PSB 2019 will be held on January 3 - 7, 2019 in Kohala Coast, Hawaii. Tutorials and workshops will be offered prior to the start of the conference. PSB 2019 will bring together top researchers from the US, the Asian Pacific nations, and around the world to exchange research results and address open issues in all

aspects of computational biology. It is a forum for the presentation of work in databases, algorithms, interfaces, visualization, modeling, and other computational methods, as applied to biological problems, with emphasis on applications in data-rich areas of molecular biology. The PSB has been designed to be responsive to the need for critical mass in sub-disciplines within biocomputing. For that reason, it is the only meeting whose sessions are defined dynamically each year in response to specific proposals. PSB sessions are organized by leaders of research in biocomputing's 'hot topics.' In this way, the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field.
