Scientific Python is a significant public domain alternative to expensive proprietary software packages. This book teaches from scratch everything the working scientist needs to know using copious, downloadable, useful and adaptable code snippets. Readers will discover how easy it is to implement and test non-trivial mathematical algorithms and will be guided through the many freely available add-on modules. A range of examples, relevant to many different fields, illustrate the language's capabilities. The author also shows how to use pre-existing legacy code (usually in Fortran77) within the Python environment, thus avoiding the need to master the original code. In this new edition, several chapters have been re-written to reflect the IPython notebook style. With an extended index, an entirely new chapter discussing SymPy and a substantial increase in the number of code snippets, researchers and research students will be able to quickly acquire all the skills needed for using Python effectively.

Uses a question and answer format to provide information about such things as how birds live, fly, and migrate, as well as why some birds are in danger of extinction.

The Companion Encyclopedia of Middle Eastern and North African Film is a unique, one volume work which illuminates a fascinating variety of cinema which is little known outside its own area. The Encyclopedia is divided into nine chapters, each written by a leading scholar in the field. Each chapter covers the history and major issues of film within that area, as well as providing bibliographies of the leading films, directors and actors. The areas covered are: Central Asia, Egypt, Iran, Lebanon, Syria, Iraq, Kuwait, Libya, The Magreb, Palestine, Turkey. This Encyclopedia will be an invaluable reference tool for students and scholars of Film and Media Studies. It contains more than 60 black and white photographs of featured films, includes references and suggestions for further reading at the end of each chapter, and the volume concludes with comprehensive name, film and general indexes.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Scholars have long worked to identify the names of tribes and other groupings in the Americas, a task made difficult by the sheer number of indigenous groups and the many names that have been passed down only through oral tradition. This book is a compendium of tribal names in all their variants--from North, Central and South America--collected from printed sources. Because most of these original sources reproduced words that had been encountered only orally, there is a great deal of variation. Organized alphabetically, this book collates these variations, traces them to the spellings and forms that have become standardized, and supplies see and see also references. Each main entry includes tribal name, the "parent group" or ancestral tribe, original source for the tribal name, and approximate location of the name in the original source material.

Monsoon [] other] Waters is a collection of essays and graphic material arising from a symposium held at the University of Westminster, 12-13 April 2018.
