At its core, problem-based learning offers students a "messy," complex problem that requires research and critical thinking to resolve. Because the Internet is such a powerful research tool, it is tailor-made for use in problem-based learning. This guide coaches both educators and students on using the Internet to solve complex problems. Teachers are introduced to how the Internet is organized and how to access its resources without too much technical information. Students are given eight problem-based learning scenarios that put them in the role of a particular character. Successful completion of these scenarios requires extensive Internet research and all of the steps of problem solving, including mapping and defining. Teaching notes and reproducible problem logs are included.Grades 3-6

Includes 30 one-page "shorts" about key events in world history, reproducible activity sheets, map, graph, and chart activities, extension activities, and assessments.

" Emma Griffin gives a new and powerful voice to the men and women whose blood and sweat greased the wheels of the Industrial Revolution " (Tim Hitchcock, author of Down and Out in Eighteenth-Century London). This " provocative study " looks at hundreds of autobiographies penned between 1760 and 1900 to offer an intimate firsthand account of how the Industrial Revolution was experienced by the working class (The New Yorker). The era didn' t just bring about misery and poverty. On the contrary, Emma Griffin shows how it raised incomes, improved literacy, and offered exciting opportunities for political action. For many, this was a period of new, and much valued, sexual and cultural freedom. This rich personal account focuses on the social impact of the Industrial Revolution, rather than its economic and political histories. In the tradition of bestselling books by Liza Picard, Judith Flanders, and Jerry White, Griffin gets under the skin of the period and creates a cast of colorful characters, including factory workers, miners, shoemakers, carpenters, servants, and farm laborers. " Through the ' messy tales ' of more than 350 working-class lives, Emma Griffin arrives at an upbeat interpretation of the Industrial Revolution most of us would hardly recognize. It is quite enthralling. " —The Oldie magazine " A triumph, achieved in fewer than 250 gracefully written pages. They persuasively purvey Griffin ' s historical conviction. She is intimate with her audience, woeing it and teasing it along the way. " —The Times Literary Supplement " An admirably intimate and expansive revisionist history. " —Publishers Weekly

Welcome to the Second International IFIP Entertainment Computing Symposium on st Cultural Computing (ECS 2010), which was part of the 21 IFIP World Computer Congress, held in Brisbane, Australia during September 21 – 23, 2010. On behalf of the people who made this conference happen, we wish to welcome you to this inter- tional event. The IFIP World Computer Congress has offered an opportunity for researchers and practitioners to present their findings and research results in several prominent areas of computer science and engineering. In the last World Computer Congress, WCC 2008, held in Milan, Italy in September 2008, IFIP launched a new initiative focused on all the relevant issues concerning computing and entertainment. As a - sult, the two-day technical program of the First Entertainment Computing Symposium (ECS 2008) provided a forum to address, explore and exchange information on the state of the art of computer-based entertainment and allied technologies, their design and use, and their impact on society. Based on the success of ECS 2008, at this Second IFIP Entertainment Computing Symposium (ECS 2010), our challenge was to focus on a new area in entertainment computing: cultural computing.
