## **N14 | Cummins Inc.**

The Cummins N14 is a popular diesel engine prevalently installed in commercial trucks, RVs and agricultural and construction equipment. Built on a basic 855 cubic inch Cummins engine, the N14 was produced from the late 1980s until 2000, when it was discontinued and replaced with the ISX line of engines.

## **Cummins N14 Engine Specs | It Still Runs**

The N14 Celect was the first Cummins engine to feature an electronic injection system. The Celect fuel system produces systematic pressure throughout each injection cycle unlike the common rail fuel system of the 855, or older M11 or L10 models. Albeit the injectors are still cam actuated the ECM controls the metered flow of fuel to the injectors.

## Read Book Cummins Engine N14

The N14 Prior to the release of the N14, the NTC was the workhorse of the Cummins line. For a while, it was really one of the best over-the-road engine applications. It had two versions: a small cam with a diameter of under 2 inches, and a larger cam to help support the increasing injector pressures.
