Products - Hesston

Hesston has been known as the hay and forage innovator since 1955, when the company developed the first commercially available self-propelled windrower. Other industry firsts have included the first hydrostatic windrower, the first center-pivot mower-conditioner and the first big square baler—which had nearly 50 individual patents of its own.

Hesston 1120, 1130, NH 479,488,489 - posted in Machinery: After much thought I think Im in the market for an old haybine. With my narrow roads, tight gates and limited tractor weight, a side pull non pivot I think is the way to go. I have heard lots about nh 479, 488, 489 haybine and know that they are rock solid. I am partial to Hesston somewhat because of a close dealer and past experiences.

mower-conditioners. The owner's manual of most mower-conditioners will have the proper clearance and the correct procedure for making this adjustment. Generally, the roll clearance should be in the range of 0.060 (1/ 16) to 0.090 (3/ 32) inches. If the clearance is less than this range, excess leaf loss and roll wear
